Why should you go to this global seminar?

Program

You get to experience places that we read about and interact with locals to make what you are learning come alive.

The focus is on ethnographic research skills and practical program development applications that you can use in future jobs.

You get to see how skills you learn are applied in a specific local context, and one that on the surface seems similar but in many ways is very different.

The course meets many requirements.

This is my area of expertise! And I know where the good food is...

Place

Thailand is a very affordable destination and very tourist friendly.

Before Covid, Bangkok had more international visitors than Paris or London!

We will also visit Lop Buri, Pattaya, and Chiang Mai.

Plus, you will have the opportunity to explore other regions (and glorious beaches) and nearby countries because of the program schedule.

Did I mention the food?

The Global Seminar in Bangkok, Thailand was an incredibly eye-opening experience for me for many reasons. Through the group tours to many non-profit foundations, we got to visualize first-hand how vast gender disparities in access to healthcare are... The seminar also included an up close look at several clinics and hospitals that were on the front-lines of antiretroviral administration of at risk populations. In addition to these tours, we were lucky enough to have several guest speakers including a Buddhist Monk and a transgender advocate for representation.

We had ample time on the weekends to complete our own travels and I was lucky enough to travel with friends to Chiang Mai, Vietnam and Cambodia. Thailand is incredibly affordable and Professor Kang made sure to show us where to spend our money on the most delicious food. The Bangkok Global Seminar was an amazing addition to my summer and Global Health/Anthropology course work!

Obviously there is still room for improvement, but the attitude towards homosexuality in Thailand is quite open. I have been to quite a few countries, and in no other have I seen homosexuals live their sexual orientation so

openly.

Most Queer Rights in the World?

OPEN SOCIETY

Thailand takes lead in LGBT rights

Analysis | 16.10.2020 | 3.5 Minutes @ Southeast and East Asia

© Olesya Kuznetsova / shutterstock.com

LGBT life is omnipresent in Thailand. Gay and lesbian characters play various roles in TV shows. Prominent bloggers and YouTubers of the LGBT community have tens of thousands of viewers. Last year, Thailand also had its first transgender candidate for prime minister, Pauline Ngarmpring.

If you're thinking this is just another tourism board attempting to slip their sticky fingers into our pink pockets without taking real action to support LGBT rights, think again. Here's five fast facts on why Thailand is a true leader in LGBT rights.

5. Legal rights

Homosexual activity has been legal in Thailand since 1956

To put this in perspective, homosexuality only became legal in the USA in 2003 after the Supreme Court ruled in favour of us during Lawrence v. Texas.

4. Government protections

Sexual orientation and gender identity are specifically protected in the Thai constitution

While there are no stand alone laws protecting the LGBT community, both "sexual orientation" and "gender identity" are specifically mentioned and protected from discrimination in the Thai Constitution.

3. Bangkok's gay village

Thailand has the largest and loudest gay villages in Asia

Gay travellers in Bangkok must visit Silom to experience the country's (if not the continent's) livellest gay village. Outside of the capital, raucous gay districts are found in Phuket, Pattaya and Chiang Mai. Even smaller cities are peppered with cabarets and gay hangauts!

2. Military service

Thai LGBT people can serve openly in the military

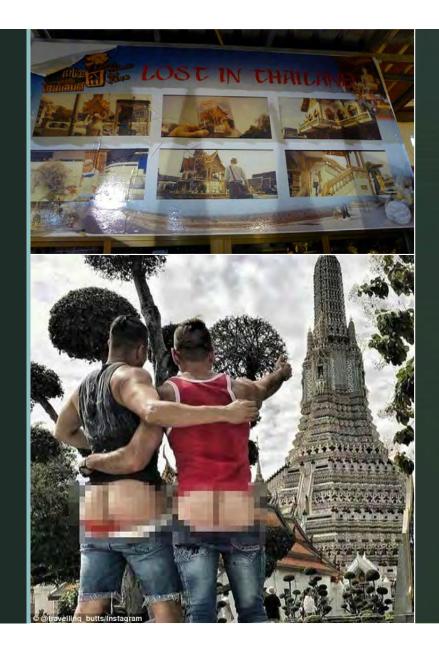

Again, unlike America where Trans people were recently banned from serving, Thailand welcomes anyone into its military ranks.

1. Kathoey

Transgender people are widely accepted

While there are many roads to pave when it comes to transgender rights in Thailand, the community as a whole is widely accepted and in some ways celebrated. The popular opinion of trans people is extremely favourable and trans individuals are well represented in pop culture and Thai television. And although it was overturned lost year in an unfortunate defeat, transgender people were legally allowed to change their gender from 1932 – 2018!
