SYSTEMWIDE OFFICE

Confidential Health History Form and Instructions for Students

START THIS PROCESS EARLY. Read carefully and complete the following form before your health clearance appointment.

- The UCEAP Health Clearance is a participation requirement. It cannot be waived. If you do not comply with all aspects of the UCEAP health clearance process, you may be dismissed from UCEAP.
- Complete the confidential form accurately and truthfully before your health clearance consultation. Failure to provide complete and accurate information to the health professional may be grounds for non-participation in UCEAP.
- UCEAP strongly encourages you to fully disclose your health history, including pre-existing conditions, to the
 medical professional even if you believe that a condition is under control. Your confidential disclosure will allow
 medical professionals to better advise you and discuss possible continued treatment plans in support of your
 participation in UCEAP. UCEAP can work with you to identify resources abroad.
- You are responsible for notifying UCEAP immediately of any changes in your health before departure or while on the program. UCEAP may require a second clearance or a letter from the treating physician indicating that you can study abroad. Failure to disclose any health changes may be grounds for withdrawal.

KNOW BEFORE DEPARTURE: If you have a Chronic Medical condition, discuss with your doctor how you will manage your condition abroad. Pre-existing conditions are often intensified by living in a different environment; there may be fewer, or inexistent, local resources to help you manage your condition. If you have a documented disability, and are registered through your UC campus disability office, request an accommodations letter well before departure. Follow protocols indicated on the program Predeparture Requirements (PDR) section in your UCEAP portal.

If you are Traveling with Prescription Medication

- 1. Commonly prescribed medication in the US could be unlicensed or prohibited in other countries. Verify that your medication is legal and that you can take a supply to last throughout your stay. Although medications in amounts for personal use generally are not inspected or questioned, some countries will not allow any amount of the medication, particularly if it contains controlled substances. Inform yourself. Talk with your doctor if you need to switch medication. If your prescription medication contains a controlled substance, review medication regulations on official government websites. Check the Predeparture section of your UCEAP portal for specific country information. Also, web addresses and excerpts of national statutes for most countries are produced by the International Narcotics Control Board, www.incb.org/incb/en/psychotropic-substances/travellers_country_regulations.html.
- 2. Carry a letter from your physician, on letterhead, explaining your diagnosis, treatment, and prescription regimen. Always carry your prescription medications in original containers, and keep the letter from your physician handy. Do not make plans to have refills mailed to you.
- 3. You must be stable on your medication before departure. Medically stable means that you must be in a state where no changes in symptoms are foreseen or expected. Work closely with your doctor to design a treatment plan, understand possible triggers, and know how to reach out for help, if needed.

Instructions (May vary depending on your campus protocols. Check with your UC campus office.)

FILL OUT this form completely and honestly before your health clearance appointment.
GIVE a copy of this completed form to the health practitioner during your clearance appointment.
DISCUSS your health history and information and a contingency plans in case you need to seek care abroad.
<u>TAKE a copy</u> of your completed confidential health history form abroad to share with local health practitioners in case of a medical emergency. Do not mail a copy to the UCEAP Systemwide Office.

Confidential Health History Form

DO NOT SEND A COPY OF THIS FORM TO YOUR CAMPUS EAP OFFICE OR TO THE UCEAP SYSTEMWIDE OFFICE

The UCEAP <u>health clearance</u> process must be completed 60 days before the official program start date (except for Chile, refer to your PDR). *It is a non-waivable requirement.* Your answers below and a review of your health records on file will be used during the health clearance process. You must inform UCEAP or your UC campus SHS, of any recent medical or special needs or changes in health that occur before the start of the program.

Complete this form BEFORE your medical appointment. Failure to provide complete and accurate information may be grounds for non-participation in UCEAP. Your confidential disclosure can help you and the clinician to better plan for a successful and safe experience abroad.
